

DON'T LET HEAVY METALS GET YOU DOWN.

Dietary Supplements, foods and beverages are a significant potential source of heavy metal contamination. Regulatory bodies and cGMP regulations mandate testing of your products to meet heavy metals exposure limits to ensure your customers of the safety and integrity of your products.

DYAD LABS OFFERS:

- ⦿ Routine elemental sample analysis – As, Cd, Pb and Hg
- ⦿ Characterization of individual raw ingredients, intermediates and finished products
- ⦿ Complete 34 metal scan option
