

With ISO/IEC 17025:2005 accreditation, Dyad Labs has become a part of an internationally recognized standard of quality for testing laboratories.

WHY CHOOSE AN ISO ACCREDITED LABORATORY?

Accreditation is an indicator of technical competence & quality in the following areas:

- ⦿ Laboratory customers, regulatory authorities and accreditation bodies will use ISO/IEC 17025:2005 accreditation to confirm or recognize the competence of a laboratory
- ⦿ Validity and appropriateness of test methods
- ⦿ Suitability, calibration and maintenance of test equipment & testing environment.
- ⦿ Quality assurance of test and calibration data.
- ⦿ Our Systematic approach of process control and procedures have been verified
- ⦿ We are required to participate in proficiency testing programs
- ⦿ Dynamic quality management system based on continuous improvement ideology

// We assess each test request to ensure that the method is fit to analyze that formulation, and in the process, we have developed new, robust methods specifically designed for the diverse products in the dietary supplement industry.

– Spencer Carter, PhD – Sr. VP of Dyad Labs

USING A LAB THAT IS ALREADY 17025 ACCREDITED?

Not all ISO scopes are equal. Not all methods offered by the lab is in their ISO scope.
